1 btable

btable creates a simple barplot in a \LaTeX tabular. As an example, add this to a Sweave file:

```
\begin{tabular}{ll}  
<<echo=false, results=tex>>=  
x <- 1:5  
cat(btable(x, before = paste(1:5, "&"), after= "\\|\\|\\|\\n"))  
@  
\end{tabular}
```

The output should be:

```
> toLatex(sessionInfo())
```
