## Contents

SSRN_stats .....	1
<b>Index</b>	<b>3</b>

---

SSRN_stats	<i>Download Download Statistics from SSRN</i>
------------	---

---

## Description

Download download statistics from SSRN

## Usage

```
SSRN_stats(id, write.file = FALSE, append.file = TRUE,  
           file.prefix = "SSRN", file.timestamp = TRUE)
```

**Arguments**

id	integer: the author's Id
write.file	logical
append.file	integer: the author's Id
file.prefix	character
file.timestamp	logical

**Details**

The function reads the whole author page and then looks up the papers via regular expressions.

**Value**

A list

- author.rank.downloads
- author.rank.citations
- total.downloads
- downloads `i` a data.frame

**Author(s)**

Enrico Schumann

**Examples**

```
## Not run:  
## the package author's SSRN page  
SSRN_stats(895233)  
  
## End(Not run)
```
