password *Random Password Generation*

Description

Create random passwords consisting of letters, numbers and punctuation characters.

Usage

```
password(n = 8, numbers = TRUE, case = TRUE,  
         special = c("?", "!", "&", "%", "$"))
```

Arguments

n	integer: length (in the sense of <code>nchar</code>) of password
numbers	logical: include numbers 0 to 9?
case	logical: use upper and lower case letters?
special	a character vector of punctuation characters, or FALSE.

Details

Creates a random combination of characters, using the function [sample](#).

Value

A character vector of length one.

Author(s)

Enrico Schumann

Examples

```
password(8)  
password(10, numbers = FALSE, special = "/")
```
